**RE: Fast-Track Label Amendment
Engenia herbicide (EPA Reg. No. 7969-472)**

Dear Ms. Schmid:

During a recent meeting with EPA, BASF learned that five states (AR, IA, IL, IN and NE) had agreed to additional label restrictions for the 2023 season, in addition to the label restrictions previously requested by South Dakota. Since that time BASF have been informed that both AR and NE have decided against those additional restrictions and will remain unchanged for 2023. In response to those states' decisions, BASF is submitting a label amendment for Engenia herbicide (7969-472), pursuant to 40 C.F.R. § 152.44 to change the directions for use on this product to further restrict use of this product when used in IA, IL, IN, and SD.

The previously 2022 approved Minnesota collateral labeling has been amended as requested by EPA.

Please note this submission is intended to supersede BASF's 1/23/2023 submission for AR, IA, IL, IN, MN, NE and SD collateral label.

This fast-track amendment contains only specific EPA requested changes to the currently approved Engenia herbicide Master label and the addition of the State Specific Restrictive Collateral labeling to the end of the Engenia label. Once approved the five new or amended collateral labels will be added to BASF's website (www.EngeniaHerbicide.com/labels).

No other changes have been made to the proposed labeling.

This is not a PRIA action.

Included with the administrative documents are the following:

- EPA Application form 8570-1
- Proposed Engenia herbicide Master, supplemental label for label website and collateral labeling
- Annotated proposed Engenia herbicide Master, supplemental label for label website and collateral labeling

Thank you for your assistance with this matter. If you should have any questions, please feel free to call me at (919) 225-9220.
